Advantages

**One-click AI-based
portfolio management**

**AI Automated
Market Maker**

**AI-powered notifications and
signals**

**Trading bots programming
using regular language**

**Dynamic liquidity pool
and commissions**

**Protocols with the
best liquidity**

**White-label solutions as a
product or subscription model**

**A marketplace for
trading bots**

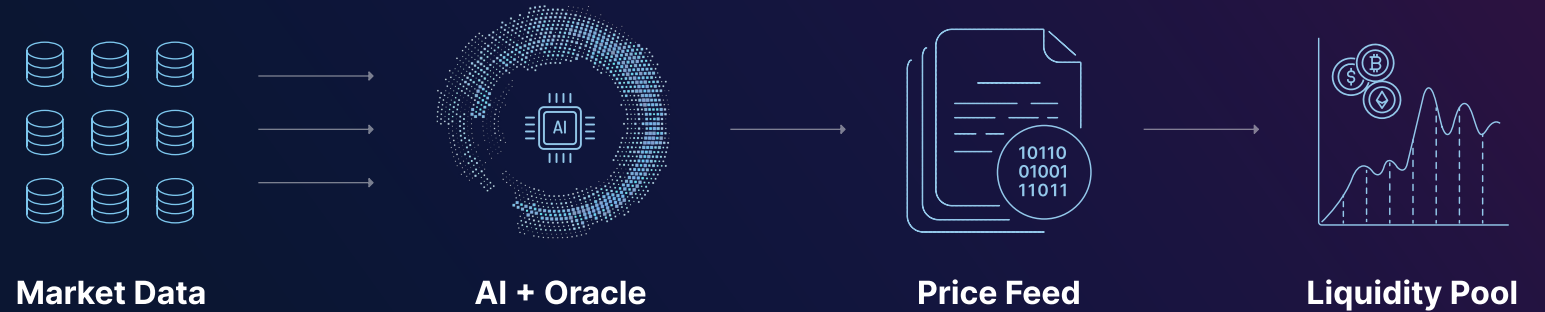

zkRollups support

KEY FEATURE #1

AI + Oracle = best price guarantee

How it works

1. AI suggests optimal settings to the liquidity pool based on the preferences indicated by the LP owner.
2. AI forecasts demand and supply for an asset, including the data gathered from a network of Oracles connected to other crypto exchanges.
3. AI dynamically adjusts the LP commissions based on the current market data.

Best liquidity within the DEX landscape provided by AI

Zero slippage even during high market volatility

Dynamic commission adjusted by AI

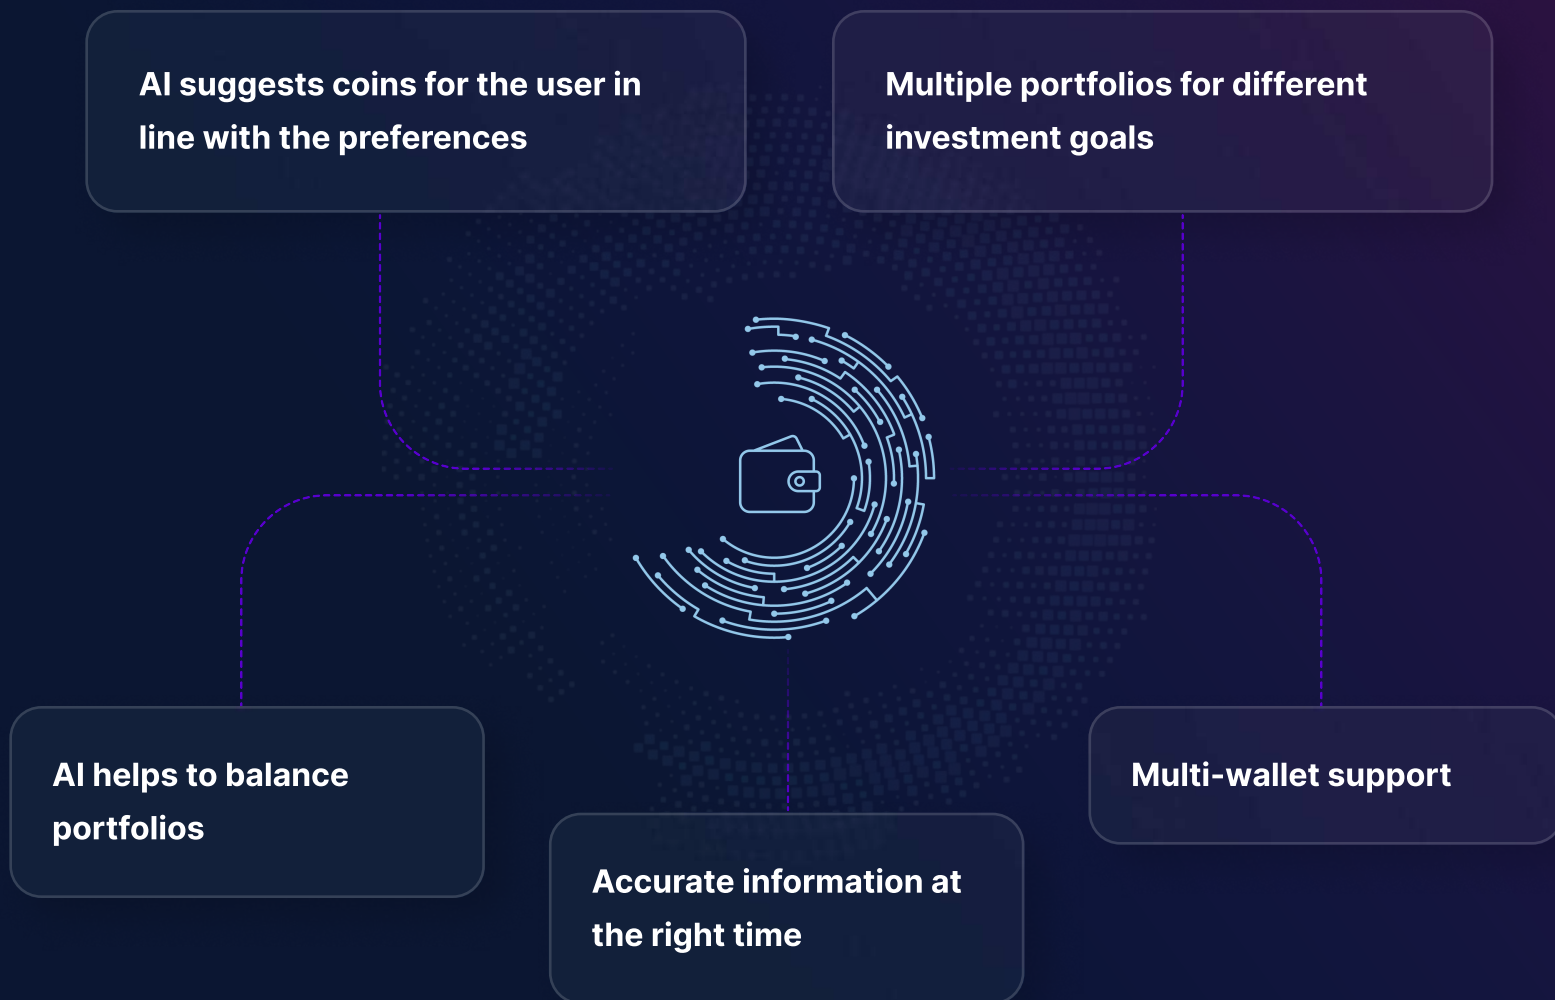

Dynamically balanced Liquidity Pool

KEY FEATURE #2

One-click **AI-based** portfolio management

How it works

1. Client specifies the portfolio parameters such as the cryptocurrencies, amount and risk preferences
2. AI analyzes the assets and the corresponding projects and generates a list of suggestions to add to the portfolio
3. User selects individual suggestions or accepts the entire list
4. User receives a well-balanced portfolio with regular re-balancing recommendations generated by the system

KEY FEATURE #3

Professional **AI-powered** trading tools

How it works

1. AI analyses market data and creates corresponding suggestions
2. User formulates market order instructions based on the given recommendations
3. AI executes the instructions at the optimal market conditions

AI-powered trading signal generation

Instruments diversification to fulfill any deal with the best price

Language model handling of trading orders

Fixing profit/loss based on the specified risk tolerance

KEY FEATURE #4

AI arbitrage signals for trading bots

How it works

1. The system trading data from the leading DEXs and CEXs
2. The system identifies trading pairs available for arbitrage deals and calculates the finalized profit of the deals
3. AI suggests deals in accordance with the user preferences such as portfolio strategies, exchanges, blockchains, ROI and risk, etc.
4. The user selects individual deals or accepts the entire list

Accurate profit calculation before deal confirmation

AI suggests the most suitable deals for the client

Simple and clean visualization of complex deals

Low latency connection to leading exchanges

Omnichannel arbitrage signals on the go

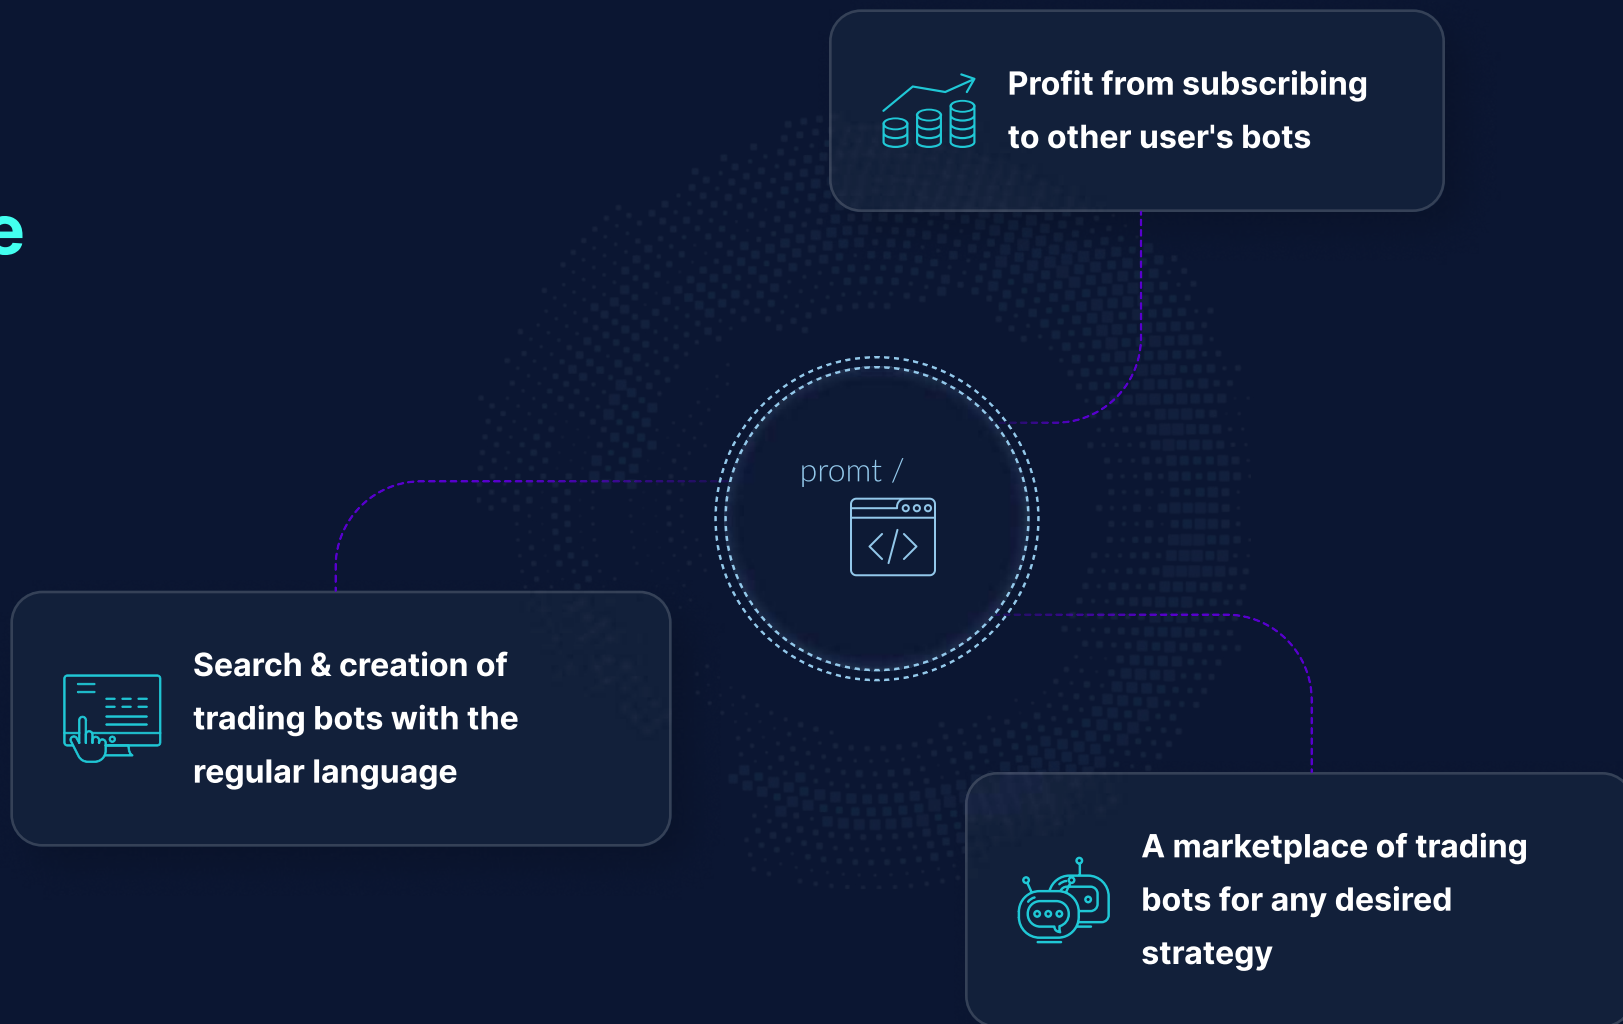

AI based search for arbitrage opportunities

KEY FEATURE #5

Trading Bots **Marketplace**

How it works

1. A trader describes the desired trading algorithm using the regular language
2. AI coupled with a LM create a trading bot ready to execute trades
3. Other traders subscribe to the service of this bot
4. The creator of the bot earns a subscription fee, while the subscribers benefit from the bot's trades

Ethereum **ETH**
(ERC-20)

Bitcoin **BTC**
(Bitcoin)

Litecoin **LTC**
(Litecoin)

Arbitrum **ARB**
(Arbitrum)

Polygon **MATIC**
(Polygon)

Roadmap Milestones

Q2 2024

- Token page update
- DFP private sale start
- Multi-wallet connection support
- Development start of AI and Oracles services
- Best liquidity protocols support
- [Fees settlement in DFP](#)

Q3

- DFP smart contract launch
- DeFiPool IDO
- DFP listing
- AI Automated Market Maker
- AI-powered portfolio formation
- [DFP locking for benefits](#)

Q4

- AI-powered signals and notifications
- AI Arbitrage signals
- AI-powered portfolio suggestions
- [Purchase subscriptions in DFP](#)
- zkRollup support

Q1 2025

- AI-based portfolio re-balancing
- Creation of trading bots and algorithmic orders in regular language with AI
- API update for white-label solutions
- [DeFiPool's ecosystem loyalty program update](#)

AI technologies - the future of DEXs today

AI-powered management

Efficiently maintain investment strategies with portfolio re-balancing to improve performance and reduce risk.

AI based trading tools

Create sophisticated trading strategies and professional-level trading bots with AI.

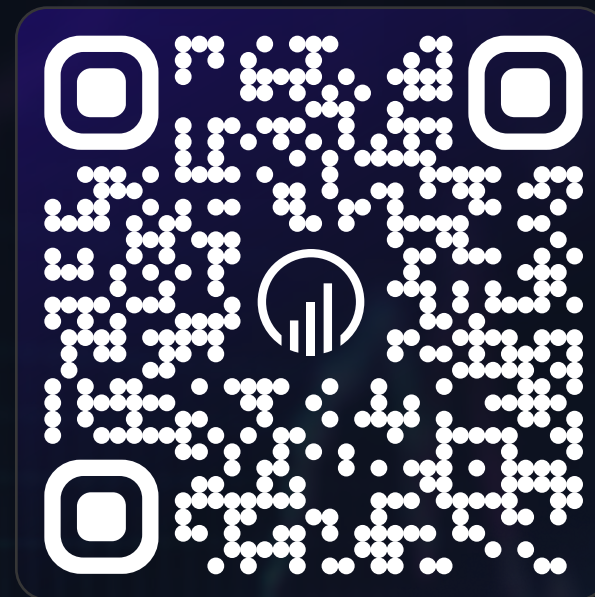

Exchange with AI engine

The exchange is responsive to market conditions, providing better liquidity and favorable trading conditions.

White-label solutions

Provide customers with AI-powered DEX without developing own infrastructure.
